New Pathway 6

OET

USMLE, a dream for some, a need for some and for some the purpose of life. Going through steps, electives and

paperwork can be overwhelming. It demands years of patience, diligence and perseverance. You have to come out of your comfort zone to fulfill - The American Dream; journey from a medical student to a US resident.

Years of hard work, yarns of hope and unmeasurable patience keeps one glued to this path, sooner or later we do end up with our success stories. As similar it may seem for everyone, we all have our unique stories, struggles and obstacles during the preparation.

If you are determined, dedicated & devoted to do whatever it takes to fulfill your desire, then nothing can stop you from getting it. For many of us applying this year, understanding the challenges of this journey we feel honored to present the very first newsletter from THE IMG PROJECT- TEAM SEBAS; edition- August 2021.

Please share your feedback!
